

Storm Thorgerson

23 March - 14th April 2013

The creator of some of the most iconic album covers today, including Pink Floyd's instantly recognisable Dark Side of the Moon. Many of Thorger-son's classic album covers have become master-pieces in their own right and were showcased at this exhibition.

We were very saddened by the news that Storm passed away shortly after this final exhibition and our thoughts are with his family and friends.
